COURSE DESCRIPTION

1. General data

1.1. Higher Education Institution	University of Agricultural Sciences and Veterinary Medicine from	
	Cluj-Napoca	
1.2. Facultaty	Food Science and Technology	
1.3. Departament	Food Engineering	
1.4.Domain of study	Food Engineering	
1.5.level of study ¹⁾	Bachelor	
1.6.Specialization/ Program of study	Food control and Expertise	
1.7. Form of teaching	Full Time	

2. Information on the discipline

2.1. Name of the course Unit Operation in Food Industry – part 2								
2.2. Course coordinator				Assoc. pr	Assoc. professor MUNTEAN MIRCEA-VALENTIN			
2.3. Seminar / laboratory/project coordinator				Assoc. pr	Assoc. professor MUNTEAN MIRCEA-VALENTIN			
2.4. Year of study	II	2.5. Semester	IV	2.6. Type of		2.7. Course	Content ²	DD
				Evaluation	Sumate	regime	Level of	DI
							complulsory ³	

3. Total estimated time (teaching hours per semester)

3.1. Hours per week – full time programme	2	of which care: 3.2. lecture	1	3.3. seminar/ laboratory/ project	1
3.4. Total number of hours in the curriculum	28	Of which: 3.5.course	14	3.6.seminar/laboratory	14
Distribution of the time allotted					hours
3.4.1. Study based on book, textbook, bibliography and notes					
3.4.2. Additional documentation in the library, specialized electronic platforms and field					10
3.4.3. Preparing seminars/ laboratories/ projects, subjects, reports, portfolios and essays					9
3.4.4.Tutorials					4
3.4.5.Examination					4
3.4.6. Other activities					
3.7. Total hours of individual study 47					
3.8. Total hours on semester 75					
3.9. Number of credits ⁴					•

4. Prerequisites (is applicable)

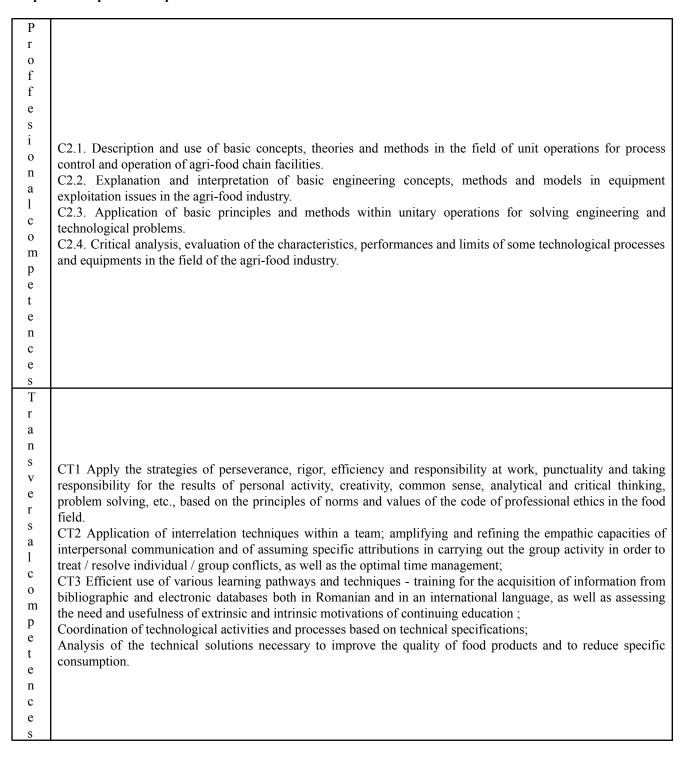

4.1. curriculum-related	Physical science, technical drawing, Special mathematics, Unit operation in food industry part 1
4.2. skills-related	The student should have knowledge of Inorganic and organic chemistry, Physical and colloidal chemistry, technical drawing

5. Conditions (if applicable)

5.1. for the lecture	It follows a direct response of the information presented in question and answer
	from both students and teachers. Academic discipline enforce the time start and end

	of the course. We do not allow any other activities during the lecture, mobile phones are closed.
5.2. for the seminar / laboratory / project	Practical work is compulsory to wear dressing gown, consulting advisor practical work, each student will develop an individual activity with laboratory materials made available and described in practice. Academic discipline is required for the duration of works.

6. Specific competences acquired

7. Subject Objectives (as a result of the specific competences gained)

7.1. Subject general objective	Able to know unit operation of food industry branch of manufacture. Know the devices and equipments that occur transforming raw materials into		
	finished product;		
	Able to know the specific installaion used in food industry branch.		
7.2. Specific objective	Able to know and use the latest equipment, methods and measurement systems		
	that are used in heat transfer processes that occur in the processing of		
	agricultural products in specific installations;		
	Have known about the operation of the equipment and facilities in food		
	industry branch, to develop the skills to use the theoretical concepts and		
	principles in addressing practical problems found in operations and the devices		
	used in food industry.		

Analyze and evaluate the characteristics, performance and limitations of
processes and technological equipment of the food industry.
Know the important factors with which it develops, implements and monitors
the technical projects and some new technological;
To develop a project specific process or machine food industry using concepts,
theories and methods based on food industry field;
To solve concrete problems of food science based on an algorithm.

8. Content

8.1. LECTURE	Methods of teaching	Observations
Number of hours – 14		
Distillation. Basic laws of distillation. Mixtures used.	Lectures	1 lecture = 2 hours
Distillation methods and distillation installations.		
Rectification. Rectification types. Rectification	Lectures	1 lecture = 2 hours
apparatus.		
Extraction. Extraction Apparatus for solid – liquid	Lectures	1 lecture = 2 hours
extraction. Calculation elements of extraction apparatus.		
Pasteurisation. Pasteuriser. Calculations elements.	Lectures	1 lecture = 2 hours
High pasteurization . High pasteurization ALPURA	Lectures	1 lecture = 2 hours
plant Sterilization. Sterilisation apparatus. Calculation		
elements.		
Drying. Drying method. Drying apparatus. Calculation	Lectures	2 lectures = 4 hours
elements.		

8.2. PRACTICAL WORK		
Number of hours – 14		
Introduction. Laboratory safety rules. Technical	Analysis MSDS and PCC.	1 lecture = 2 hours
calculation errors, charts and measures of size	Using the Technical	
intervening processes studied in laboratory.	calculation applications in	
	the study of measurements	
	of the processes occurring in	
	lab.	11 4 21
Analysis of the sieving ranking process of granular materials in the sifting machine.	Making the measurements with experimental laboratory	1 lecture = 2 hours
materials in the sitting machine.	sifting machine.	
	sitting machine.	
Analysis of the kinetics of the sifting operation and	Making the measurements	1 lecture = 2 hours
sifting efficiency of granular materials in sifting	with experimental laboratory	
machine.	apparatus.	
Study of heat transfer in stationary state in	Making the measurements	1 lecture = 2 hours
double-tube uniflow heat exchanger. Study of heat transfer in stationary state in double-tube counter	with experimental laboratory apparatus.	
heat exchanger.	apparatus.	
near exchanger.		
Study of convective heat transfer in finned tube heat	Making the measurements	1 lecture = 2 hours
exchanger.	with experimental laboratory	
	apparatus.	
Analysis of the drying operation with heat	Making the measurements	1 lecture = 2 hours
conduction in the dryer cylinder.	with experimental laboratory	
	sifting machine.	
Recovery of the absences. Verifying knowledge	Colloquium	1 lecture = 2 hours
Compulsory bibliography:	Conoquium	1 iccture – 2 nours

- Muntean, M-V Operații Unitare în Industria Alimentară, manual didactic,Editura Risoprint, 2015 Cătunescu Giorgiana, Muntean, M-V Îndrumător de lucrări practice și aplicații în industria alimentară, Ed. AcademicPres, 2016
- Banu, C-tin si colab. Manualul inginerului de industrie alimentara, Ed Tehnica, Bucureşti, 1999 Ioancea, L. şi colab Maşini şi instalaţii în industria alimentară, Ed. Ceres, Bucureşti, 1986

Facultative bibliography:

9. Corroborating the course content with the expectations of the epistemic community representatives, of the professional associations and of the relevant stakeholders in the corresponding field

In order to identify ways of modernization and continuous improvement of teaching and course content with the current issues and practical problems teachers attend the annual meeting of the Romanian Association of Food Industry Engineers where issues are discussed current and future technologies in Romania and Europe.

10. Assessment

Type of activity	10.1. Evaluation criteria	10.2. Evaluation methods	10.3. Percent of the final grade
10.4. Lecture	Knowing the types of unit operations in the food industry studied in semester 2; Knowing compenent parts, installations function, apparatus and tools studied. Knowledge of general concepts concerning unit operations analysis; Knowledge of the factors influencing the food industry specific unit operations;	oral exam	80%
10.5. Seminar/Laboratory	Knowledge of students by the unit operations in the food industry. Knowledge of component parts, operation and use of various devices and equipment in specific food operations studied. Knowing how to determine, processing and interpretation of measurements of the processes simulated in the laboratory with the food industry.	Laboratory Colloquium and attendance course	10% +10 %

10.6. Minimum performance standards

Mastery of scientific information transmitted through lectures and practical work at an acceptable level. Obtaining the pass mark in colloquium test is the condition of graduation.

Level of study- to be chosen one of the following - Bachelor/Post graduate/Doctoral.

² Course regime (content) – for bachelor level it will be chosen one of the following - **DF** (fundamental subject), **DD** (subject in the domain), **DS** (specific subject), **DC** (complementary subject).

Course regime (compulsory level) - to be chosen one of the following - **DI** (compulsory subject), **DO** (optional subject), **DFac** (facultative subject)

⁴ One ECTS is equivalent with 25-30 de hours of study (didactical and individual study)

Disciplines: AK- Advanced knowledge, CT- Complementary Training, S- Synthesis

Laboratory work/seminar coordinator Assoc. Professor Mircea-Valentin Muntean

Course coordinator
Vircea-Valentin Muntean

Low

Subject coordinator Assoc. Professor Mircea-Valentin Muntean
